

## Press release

Bad Oeynhausen, 2019

## Medical competence and human understanding

The Herz- und Diabeteszentrum NRW (HDZ NRW) is a University Hospital of the Ruhr-Universität Bochum and an international leader in the treatment of cardiac, vascular and metabolic diseases. With 35,000 cardiac and diabetic patients per annum, 14,000 of them inpatients, the HDZ NRW is one of the largest state-of-the-art clinical centers of its kind in Europe.

More than 2,200 employees have been guaranteeing top performance and high-tech medicine in all areas for 35 years. Over 3,500 operations on the heart and coronary vessels, over 5,000 cardiac catheter examinations, 1,000 electrophysiological procedures and over 400 TAVI procedures per annum are testament to this wealth of experience. The five Clinics at the HDZ NRW provide a safe and integrated concept of prevention, diagnosis, treatment and aftercare in accordance with the latest scientific findings, state-of-the-art medical techniques and outstanding specialist expertise. This is complemented by a range of University institutes and internal services under the same roof.
